1 Does the Supdt of Monstrn attach the Monstrn hospl, does any mans now? If, as I am inclnd to think, they have not got sufficient work to keep them fully employd would it not be desirable to make use of them, sine, as the work of one as an Asst in the Well-borne section, & also for Basic inspection. Well-borne sects also demand more & more attention in future. They can do their present work, which does not call for the mark of inspectors powers & instructions as the actual Dr. does & possibly than their work also does in course of their visits to the districts.

S i r,

I am directed to state that Government are inclined to believe that the Superintendents of Industries have not sufficient work to keep them fully employed and would therefore be glad to have your opinion -- whether it is not desirable to arrange for a redistribution of their work. It might be examined for instance, whether one of the Supdts may not be posted to the C. I. Workshop, another as an assistant in the Well-boring Section (as well-boring operations demand greater attention in future) and the third on the work of boiler inspections. Their present work which consists mainly in the inspection of power installations etc. may be attended to by them in the course of their tours in the Districts.

I am to request the favour of a very early reply in the matter.

I have etc.,

C. Ranganatha Rao Saheb, Esq., B.A., B.L.,
Director of Industries and Commerce in Mysore,
(Bangalore India.)

5773

GEN. & REVENUE SECRETARIAT
19 FEB. 1927
DEVELOPMENT BRANCH.

Refer 18-2-27

To

The Secretary to the Government of Mysore,
Development Departments,
Bangalore.

Immediate

SIR,

I & C 216-26-2

With reference to your letter No. D. 5008/I & C 216-26-1 dated the 31st Decr. 1926 calling for my opinion whether it is not desirable to effect a re-distribution in the work of the Superintendents of Industries by withdrawing them from the Districts and posting one of them to the Central Industrial Workshop, another for charge of Well-Boring Operations in the State, and the third Superintendent for Boiler inspection work, I have the honor to submit that the arrangement proposed would greatly increase the expenditure on Travelling allowances without contributing anything to improvement in efficiency of work. The Superintendents who are at present stationed at Mysore, Bangalore and Shimoga in charge of the three Divisions in accordance with Government order No. Ic. 1074-5 I & C 295-23-5 dated the 18th August 1924 might as well be directed to take charge of Well-boring operations and boiler inspections, each in his own Division, in addition to their present duties.

2. The Superintendents are at present required to investigate the commercial prospects of all industrial installations which enterprising men in their Divisions desire to establish, advise them in regard to selection of suitable machinery, prepare an estimate of cost and afford technical guidance in the erection of the plant. They are also placed in charge of all the Industrial Schools in their Divisions under the Government

order referred to above. If all this work was properly attended to and needed assistance given promptly to people who have already set up industrial establishments with the advise of the Department the Superintendents of Industries would, in my opinion, have had enough work to fully occupy them. It is because this work has not been properly done that there are numerous complaints from people who have already set up mechanical plants and enterprising men are discouraged from doing anything in the way of introduction of machinery for Industrial work. In fact all the evidence that exists at present of industrial improvement seems to be unconnected with the activities of the Department.

3. I do not think there is any need to attach a Superintendent of Industries to the Central Industrial workshop. There is an Assistant Superintendent in direct charge of the workshop besides the Industrial Engineer. The overhead charges of the workshop are already heavy and to depute another Superintendent would make them heavier. The workshop is too small to need the services of more than two Officers and what is required to reduce the recurring losses is not an increase in the number of Officers, but effective and continuous supervision over the work of the Operatives by the Officers in charge with particular attention to working costs. I am inspecting in detail each of the concerns in charge of the Department and shall submit my recommendations in regard to them to Government at an early date. In the meanwhile, I beg to submit that I consider it would be a highly retrograde step to withdraw the Superintendents of Industries from the Divisions and concentrate them all at Bangalore as it would withdraw all stimulus to Industrial work in the Districts and accentuate the waning interest in the technical improvement of industries which is unfortunately observable in all directions.

I

Secretary to the Government of Mysore,
Development Departments,
B a n g a l o r e.

SIR,

With reference to your D.O. No.7259 dated the 16th January 1929 forwarding a list of reference pending in this office, I have the honour to point out that in respect of item No.24 calling for information defining the duties of the Superintendents of Industries, I have the honour to state that a programme of work for these officers during the year 1928-29 defining their duties in full prepared ~~at the~~ after meeting these officers in person was submitted to Government with my D.O. letter No.B.258/28-29 of the 11th August 1928. The First Member of Council was also pleased to be present at the meeting I had with these officers. However, I note below the more important duties of the Superintendents of Industries at present:-

(1). Provision of technical assistance for the erection and maintenance of Industrial Installations in the State.

(2). Collection of fees for assistance towards maintenance and erection of Industrial Installations in accordance with the Rules issued by Government in their Order No.D.4455-57/I&C. 390-27-7 dated the 17th October 1928.

(3). The investigation and report on applications for Industrial Loans.

(4). The supervision of the collection of ~~the~~ instalments and also arrears in respect of Industrial Loans advanced by the Department.

(5). The discharge of duties devolving on them as Inspectors of Factories under the "Factories Regulation"

(6). Investigation of applications for licenses for

(i) the transport of dangerous petroleum,

(ii) the erection of installations for the storage of dangerous petroleum, a n d such further action under the Petroleum Regulation as may be required from time to time.

(7) The inspection of motor buses and the grant of licenses after inspection to buses fit to ply for hire.

(8) The supervision and inspection of Industrial Schools working within their jurisdiction.

(9) Administrative supervision over the work of the Weaving Demonstrators working in their division.

(10) Carrying out of such Commercial and Industrial enquiries as may be refrred to them from time to time

I have the honour to be,

Sir,

Your most obedient servant,

Ranganatha Rao Sahib

ROUTINE NOTES.

[To be used only for notes, requisitions, etc., not intended for permanent record.]

D.O. Letter No.B-258/28-29 dated the 11th August 1928 from the Director of Industries and Commerce in Mysore, B'lore to the Secretary to Government, Development Departments, Bangalore.

I am desired by the Director to forward herewith enclosed two copies of the Abstract of the Proceedings of the meeting of the Superintendents of Industries of the three Divisions in the Department held in the month of July and August regarding the work done during the past year and the programme of work for the current year.

COPY

Director in charge.

AKG).

N. B.--Shouldroutine notes be written on small slips the notes must b cipoed, or slips pasted on *this form.*

11 Aug 1928

BRIEF ABSTRACT OF THE PROCEEDINGS WITH THE SUPERINTENDENTS OF INDUSTRIES IN REGARD TO THEIR WORK DURING THE PAST YEAR. AND THE PROGRAMME OF WORK FOR ~~1927-28~~ 28-29

The Superintendents of Industries are entrusted or will shortly be entrusted with the working of the following Regulations It was decided that orders of Government should be obtained in regard to the following points for working these Regulations.

(1). MOTOR VEHICLES REGULATION. The fees for inspection were reduced from Rs.5/- to Rs.2-8-0 per motor car in the order directing that the Superintendents of Industries should be the officers to inspect vehicles and that the fee should be credited to Government. The reduction in the fee appears to be due to a mistake, and may be raised to its original figure., as much higher fees are charged in British Indian Provinces.

This is probably to be dealt with in the Protection Br. etc.

(2). CERTIFICATES FOR INSPECTION OF BUSES are now being granted to the Superintendents of Industries. The form of certificate should be revised so as to conform the Rules. A suitable form was prepared for approval by Government.

(3). THE SKILLED RULES REQUIRED: The drivers of buses plying for hire should be competent to undertake road side repairs before licences were granted to them. It is advisable that the Superintendents should be entrusted with the duty of finding out if the drivers are competent to carry out such repairs. A statement showing the points on which proficiency may be demanded was prepared.

(4). THE SUPERINTENDENTS OF INDUSTRIES may be specifically nominated as the Officers authorised to carry out inspection of buses.

(5). THE SUPERINTENDENTS MAY BE EXEMPTED from paying for driving licences.

FACTORIES REGULATION.

(1) As the Regulation will come into force on the 20th September 1928, a notification may be issued, under Rules 24, that notices of occupation by all Factories' owners should be sent to the Superintendents of Industries.

(2) Another notification should be issued calling upon all the owners and Managers of Factories to submit returns to the Superintendents of Industries, excepting notices under section 34 of the Act, which will be submitted in accordance with the Rules 76-79.

All these points have been settled in the G.O. of 18.10.28 Chap 6 in Manual Cen

(3) A notification defining the powers of District Magistrates, who are Statutory Inspectors should also be issued The powers of the District Magistrates should be confined to sanction prosecution under Section 40-1 as in Madras.

(4) The functions of District Medical & Sanitary Officers who are also Inspectors, under certain sections, should be clearly differentiated from those of the Superintendents of Industries. A set of forms in use in the office of the Inspector of Factories in Madras, may be obtained.

BOILER REGULATION.

The Rules in the Regn. have not yet issued Cen

(1). The Superintendents of Industries should be authorised to revoke or suspend licenses under Section XII of the Regulation. A set of instructions to be hung up in the Boiler Room should be prepared and submitted for approval by the Superintendents of Industries.

(2). Another set of instructions to the Superintendents of Industries, as Inspectors of Steam Boilers, should be issued. A draft will be prepared by the Superintendents of Industries.

(3). The Regulation made in the first instance may confine only to Steam Boilers and need not be made applicable to Prime Movers.

PETROLEUM REGULATION.

This work has already been entrusted to the El dept. Cen

(1). Lightning Conductors of large storage installations are not being inspected now. They may be inspected by the Office of the Electrical Department. These Officers inspect other Lightning Conductors in the State.

This may be done Cen

(2). An inspection book should be kept in all storage installations in which remarks and observations made by the Superintendents of Industries during their inspection should be entered. Extracts of this Register should be sent immediately, after inspection, to the Director and District Magistrates.

T

— do —

(3). Superintendents should be supplied with copies of Licences granted by Deputy Commissioners and Municipal Authorities for storage of non-dangerous petroleum.

Government may be requested to pass orders on the proposals already made for permitting owners of vehicles to store up to twenty gallons of petrol without a license in accordance with the practice in British India.

CHARCOAL CONFLAGRATION REGULATION.

This has already been done Cen

In view of the instructions issued by the Government of India on the matter, it seems desirable to appoint the Director of Industries as Commissioner under the Regulation. The Superintendents of Industries will be delegated with such duties as may seem suitable under this Regulation.

A.K.G.(5)

Perhaps no further action is necessary on this now as the staff has been reorganised on [illegible]

In view of the heavy work that will be imposed on Superintendents of Industries under the Factories Regulation and Boiler Regulation and the number of Registers they have to maintain and Returns they have to send, one more Clerk is needed for them. It is also necessary that the revision of the Mechanical Staff should be sanctioned very early, as a great deal more work can be done if the Mechanical staff is strengthened. At present there are only six Mechanics and four Assistant Mechanics in the Department.

11/8/28

AKG-G.

REVIEW OF WORK DONE DURING THE PAST YEAR.

The number of Installations put up by the Superintendent of each Division, the total capital invested in these installations and the amount lent by Government for this purpose are given below:-

Division.	No.	Total Capital.	Government Loan.
Mysore.	30	1,25,000.	18,397.
Bangalore.	27	95,000.	9,600.
Shimoga.	26	1,27,800.	2,000.

LOAN APPLICATIONS:-

The number of Loan applications investigated and disposed of are as follows:-

Division.	No.	Value.	No. sanctioned.	value.
Mysore.	27	1,08,718.	12	27,722
Bangalore.	40	1,42,400.	10	19,400
Shimoga.	28	--	4	2,000

DISTRICT WORKSHOPS.

The total value of work done in the Shimoga District Workshop during the year is estimated at Rs.9,122--9--9 and expenditure for wages and stores is Rs.8,073--13--0 Allowing for the stores in stock and the work in process the profit made by the Workshop during the year is estimated at Rs.1581-0-0.

Kolar District Workshop. The value of work done in the Workshop rose from Rs.1825/- in 1926-1927 to Rs.3,024/- in 1927-28. The loss in working was reduced from Rs.542/- last year to Rs.170/- The loss is due for want of adequate

adequate equipment. This is now been remedied through the generosity of the District Board who have placed a sum of Rs.3,700/- at the disposal of the Workshop for its extension. New plant has arrived and has been installed.

WORKING OF PRIVATE INSTALLATIONS.

The Superintendents of Industries report that they inspected nearly all the concerns working in their Divisions and rendered suitable assitance from time to time. The information is not definite, and they have been requested to give details. This inspection will be more systematised when the new Rules charging fees for such inspection are brought into effect.

PETROLEUM REGULATION.

Licenses for four installations were issued in Mysore, six in Bangalore and sixteen in Shimoga. Cases in which petroleum was stored without license were brought to the notice of the District Magistrate and prosecutions have been instituted.

RECOVERY OF LOANS.

The recovery of instalments of loans are always delayed. The Superintendents represent that either they or one of their Mechanics have to persistently dun the debtor before payments are made. This reduces the time available to their more legitimate duties. It is desirable to appoint a literate attender on Rs.20/- or Rs.25/- for collection of dues. This attender may be paid for from the over due interest charged the defaulters. This matter will have to be considered further

PROGRAMME FOR THE FUTURE.

The Superintendent of Mysore expects the following installations will be established during the current years:-

(1) An Oil Expeller plant at Arsikere,
(2) A sugar cane crusher plant at Frenchrocks,
(3) A Motor Repair Workshop at Hassan,
(4) Power Looms at Mysore.
(5) A Bone manure Factory at Mysore as well as Roller Mills for Jewellers etc.

It is proposed to start the manufacture of matches as a domestic industry.

The other Superintendents were instructed to give a programme of their work for the current year.
